Grip-Clamp® 2512, TWO ARM POWER LOCK

ALADCO offers a line of Pneumatic Grip-Clamps® ideal for your particular automotive, food and other industrial manufacturing requirements. Special heat treated alloy steel components offer superior wear and toughness. Adjustable cushions provide smooth, long operation. Standard arms allow for a wide range of tooling clearances. We offer toggle lock and power lock clamps allowing greater flexibility to fit all your manufacturing needs.

Toggle vs Power

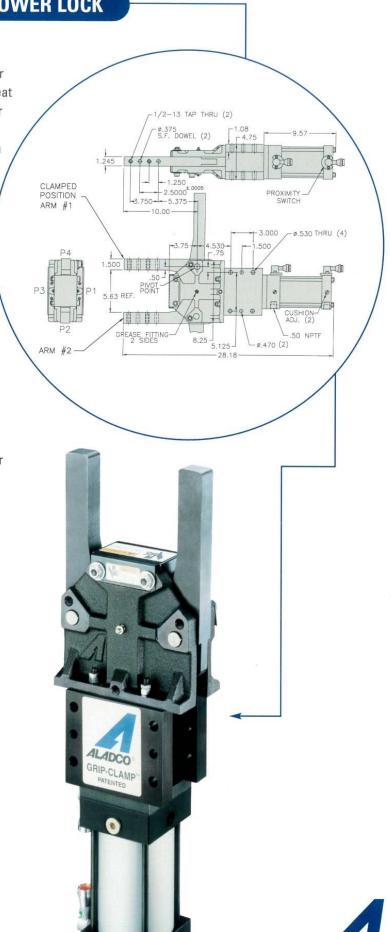

The **toggle** clamp is used for added safety and is designed so that the linkage goes over-center and remains in a positive locked position even in the absence of air pressure. The toggle clamp is unlocked only by the cylinder powering the linkage back through the over-center locked position.

The **power** lock is designed so that the linkage does not go over-center providing for variable clamping thicknesses.

We recommend the use of Aladco check valves for toggle and power applications to maintain the air pressure and clamping force.

Features

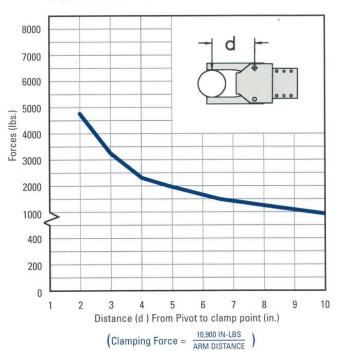

- The largest gripper available -10,900 inch-lbs. clamping force
- · Standard 90° arm openings
- · Custom arms and special openings available
- · Enclosed 1.0" cylinder rod prevents rod failure
- Powered by a 4.00" bore cylinder
- All heat treated, precision ground alloy steel components for reliability
- · Grease fittings for relubrication
- · NFPA mounting to fit a quality cylinder
- · Hydraulic cylinder option available
- · Made in the USA

ORDERING INFORMATION

To order please indicate your part number(s) by formulating the desired style number for each of the corresponding areas from the list below. See the sample part number at right.

Body	Cylinder	Port	Switch	Arm #1	Arm #2
Style	Type	Position	Option	Option	Option
SAN2512MPLE	SAO1 SA	MP2sa	MICE1SA	MPIAS52	SAMPLAT512E S

Body Style:

Style Description

2512 2 Arm Power Lock Configuration

Cylinder Type:

Style Description

A01 Air, Aluminum, 4.00" bore and 1/2" NPT ports A02 Air, Steel, 4.00" bore and 1/2" NPT ports

A03 Custom

Port and Switch Position:

Style Description

P1 Port Position #1, Switch Position #3

P2 Port Position #2, Switch Position #4 (shown in dwg.)

P3 Port Position #3, Switch Position #1

P4 Port Position #4, Switch Position #2

Switch Option:

Style Description

C1 Proximity Switches (2)

1000

R1 Reed Switches (2) (Used with an aluminum cylinder with magnetic piston)

N1 No Switches

Arm #1 Option:

Style Description

AS51 Solid

AS52 Mounting Holes (shown in drawing)

AS53 Custom

Arm #2 Option:

Style Description

AT51 Solid

AT52 Mounting Holes (shown in drawing)

AT53 Custom

* Complete part number will be acknowledged on quote

* An ALADCO® check valve is recommended to prevent the loss of clamping force if the air supply is interrupted
