

ACCU-LOCATOR™ SHIM BLOCK ASSEMBLY

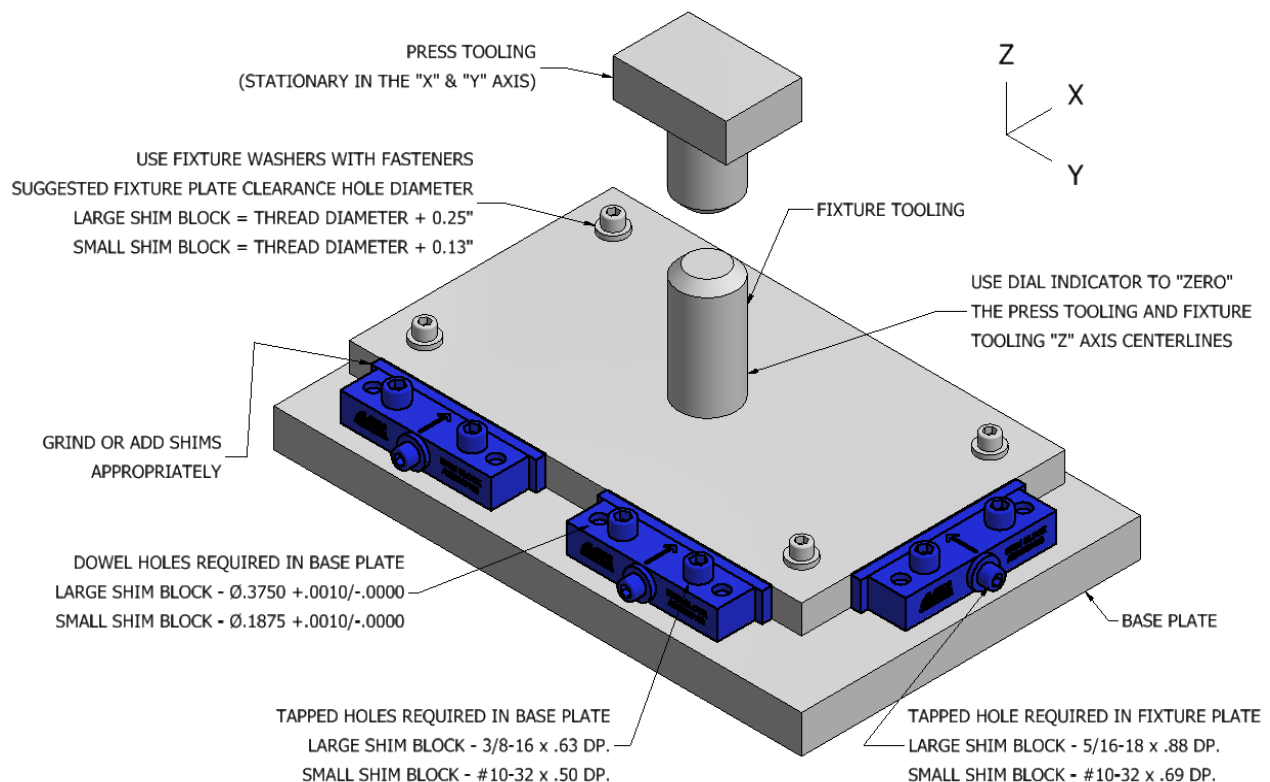

The Aladco® Accu-Locator™ is a specially designed Shim Block Assembly for high precision location of Weldments, Fixtures, and Tooling. Specifically, the Accu-Locator™ accurately holds a positive locating position and allows adjustable positioning for production machinery and related fixtures.

An essential asset to any project requiring occasional changeover, the Accu-Locator™ provides a predictable way to position, allows repeatable positioning, and makes accurate adjustments to Tooling, Weldments, and Fixtures. Typically used in sets of two or three for the X & Y locations of a tooling or fixture plate, the use of Accu-Locator™ maximizes tooling flexibility by providing the ability to fine-tune the final positioning.

Features:

- Two standard sizes:
 - AEM500120 Shim Block Assembly, Mini, 2.0"
 - AEM500103 Shim Block Assembly, 4.0" – Available Fall 2025 – Accepting Orders
- Quick and inexpensive way to locate and mount tooling plates and components
- Easy to adjust location – Simply grind shim to size or add an additional shim, available for purchase
- Made of low carbon steel – Shim is ground to close tolerance for locating
- Includes mounting hardware (bolts, washers, dowels)
- Made in Waukesha, Wisconsin USA
